Subject: NBIA OU1 - RDWP, EQuIS and fence

Categories: EZ Record - Shared

Hi Leo,

I would like to get moving again on the RDWP for NBIA OU1. Let's meet in Chicago to re-kick off this effort and to come up to speed on the issues that were preventing forward progress on this OU. I will be deploying to work on the Hurricane Maria response efforts until February 20, so let's try for a date in early March (I prefer March 5 or March 8). Moving this site into Remedial Action is one of my top priorities for this year, so I hope we can come to resolution on the sticking points.

Another effort I am undertaking with all of my sites this year, is to get all of the data into our data system, EQuIS. Please check out the two websites below for guidance in uploading the NBIA OU1 data into the EQuIS system. I would like to have all of the Remedial Investigation NBIA OU1 data entered into this database, including the VI data that was collected in 2008-2009. I understand this might take some time, so I hope that Friday, April 27, 2018 is a reasonable date to accomplish this work. If you run into problems with the system, John Canar is available to help (cc'd above).

Additionally, in reading the SOW for the NBIA OU1, I noted that a construction fence is required around the Western and Eastern lagoons as a means for site security to prevent exposure to contaminated materials. It is my understanding that there was an incident a few years back at the lagoons, and so to prevent future exposures, at this time I would like the construction fences to be installed according to the requirements of the SOW by March 30.

Thank you for your cooperation at this site, and please call if you have any questions.

Regards,
Kathy
